**Subject:** Proposal for football realignment  
**Date:** Tue, 5 Oct 2010 17:29:23 +0000

I have looked at the realignment proposal and I would like for the committee to consider placing North Laurel and South Laurel in our revised district. In Doing so, the committee could put Whitley in their place. This would geographically create two 5 team districts where each school would have two home and two away district games each year. The away travel times would also be relatively the same for all teams within the district. I am looking at the expense side of this as well.

Under the current proposal our new district would have 4 teams. This would mean only one home district game every other year and the away travel times would be disproportionate every other year for all the teams in the district.

I appreciate your time and the committees consideration of my proposal before any recommendation is made to the board.
