*"ART. 3 . . . If a participant is suspected by the referee or coach of having a communicable skin disease or any other condition that makes participation appear inadvisable, the coach shall provide current written documentation from a physician stating that the suspected disease or condition is not communicable and that the athlete's participation would not be harmful to any opponent. This document shall be furnished at the weigh-in or prior to competition in the dual meet or tournament. Covering a communicable condition shall not be considered acceptable and does not make the wrestler eligible to participate."*

*"ART. 4 . . . If an on-site meet physician is present, he/she may overrule the diagnosis of the physician signing the physician's release form for a wrestler to participate with a particular skin condition."*

Below are some treatment guidelines that suggest **MINIMUM TREATMENT** before return to wrestling:

**Bacterial diseases (impetigo, boils):** Oral antibiotic for two days and no drainage, oozing, or moist lesions.

**Herpetic lesions (Simplex fever blisters, Zoster, Gladiatorum):** Minimum of 120 hours or a full five days of oral anti-viral treatment with no new lesions and all lesions scabbed over. Visible lesions may be present and participation may be approved so long as lesions are scabbed over.

**Tinea lesions (ringworm scalp, skin):** Oral or topical treatment for 72 hours on skin and 14 days on scalp.

**Scabies, Head Lice:** 24 hours after appropriate topical management.

**Conjunctivitis:** 24 hours of topical or oral medication and no discharge.

**Molluscum Contagiosum:** 24 hours after curettage.

**NOTE TO PROVIDERS:** If your examination yields a finding that the wrestler has a contagious skin condition within these rules, no covering of such condition will allow the athlete to wrestle.
